PROFILE

Enterprise customer success leader with 15+ years in B2B SaaS, combining deep post-sales expertise with hands-on AI and automation fluency. Co-founded Roambi (acquired by SAP), then built and led SAP's EMEA digital CS function — managing a \$125M book across 1,500+ accounts with 90%+ GRR.

Now operating at the intersection of customer success and modern GTM engineering: using Clay, HubSpot, Claude API, and AI agent platforms to drive adoption, reduce churn risk, and surface expansion at scale.
